- 2016** Best International Internship

ABOUT ME

I am a motivated, confident and energetic Software Developer with a passion for web development. I do not settle for anything less than great when delivering the best products possible. I am looking forward to working in a challenging environment, where I can test myself daily.

My previous projects have influenced me to work within a team, as well as delegating myself tasks to work independently and use my own initiative throughout. During team projects I took on the role of the project leader, I assigned tasks to individuals and made sure the communication went smooth. To ensure the delivery of a high quality product within the predetermined time frame.
